## Introduction

Top To Bottom Quilting is a provider of Heirloom Quality Machine Quilting and finishing services.

My name is Linda Konkle. I have been sewing since the age of eight. When I first started quilting a few years ago, it was an immediate match. Quilting truly brings together all of the aspects of fabric, crafting, colors, etc that I love to work with. Each quilt is truly unique and takes on a life of its own. I feel like every quilt becomes another one of my “babies”. I care and nurture it through its life.

So that brings me to how I can help you. I’ve used other quilt (longarm) finishers and have been disappointed. I found they didn’t listen or care as much about my project as I did.

I knew that by starting my own finishing business I could provide a service that is extremely hard to find. I’m already fascinated by other people’s ideas and creativity and I really care about choosing the right pattern, design, and colors to make the quilt unique and special...just the way **you** want it.

I’ve developed a process whereby I listen to your wishes and desires; we collaborate on pattern, design, and colors, and ultimately, finish the quilt to your ultimate desired outcome

## Finishing Services and Pricing

Our pricing model is based on the size of your quilt in square inches because it produces the fairest, most accurate pricing.

1. Multiply your quilt’s length \* width = total sq/inches
2. Choose the machine finish for your quilt:

Machine Finish	Price per square inch
Meander	\$.013 per square inch
Semi-Custom	\$.015 per square inch
Custom	\$.019 per square inch

3. Step 1 \* Step 2 = Final machine quilting price
4. Follow the examples below:

69x90	90x95	106x98
(Approx Twin)	(Approx Queen)	(Approx King)
69*90 = 6210 sq/in	90*95 = 8550 sq/in	106*98= 10388 sq/in
(Meander) 6210 * .013 = <b>\$81.00</b>	(Meander) 8550 * .013 = <b>\$111.00</b>	(Meander) 10388 * .013 = <b>\$135.00</b>
